

# **Developmental, self and cognitive-affective aspects of disordered eating, obsessive-compulsive and generalised anxiety behaviours.**

Researchers: Angelique Brown, Stella Chaviaras  
& Shary Tan

Supervisors: Richard Moulding & Maja Nedeljkovic

Participants Required: 156 Males/Females

Participation Time: approximately 70 mins (Max of 90 mins)

This study is concerned with the developmental, self and cognitive factors associated with disordered eating, generalised anxiety and obsessive-compulsive symptoms. As a research participant, you will be required to complete a number of questionnaires in your own time on the internet by following this link:

<http://opinio.online.swin.edu.au/s?s=5758>

You have the option to save your responses and continue at another time, maintaining full confidentiality.

The questions refer to self-beliefs, memory, child and adult relationships, eating behaviours, obsessive-compulsive and generalised anxiety thoughts and symptoms.

There are no right or wrong answers.

This will provide you with the opportunity to participate in a psychological study.

If you have any concerns, please contact:  
angeliquebrown@groupwise.swin.edu.au
